Several different translations and interpretations of the same fable may be found on many of the pages here; including, now and again, a simplified version I wrote. Planudes has little authority for any thing he has delivered concerning him; nay, as far as I can find, his whole account, from the beginning to the end, is mere invention, excepting some few circumstances; such as the place of his birth, and of his death; for, in respect of the time in which he lived, he has blundered egregiously, by mentioning some incidents as contemporary with Æsop, which were far enough from being so. On January 16th, 1787, for example, he writes to Colonel Edward Carrington: I am convinced that those societies as the Indians which live without government, enjoy in their general mass an infinitely greater degree of happiness than those who live under the European governments.

Inscription in ink to front pastedown, further writing in ink to rear endpapers. He sends him into Egypt in the days of Nectanebo, who was not in being till two hundred years afterwards; with some other gross mistakes of that kind, which sufficiently shows us that this life was a work of invention, and that the inventor was a bungling, poor creature. If that does not put them to rights, send them to Europe to see something of the trappings of monarchy, and I will undertake that every man shall go back thoroughly cured.
