## 4 Ways AI Is Transforming the Telecom Industry

Internal disturbances range from chance and wear-out failures of components to hardware and software design errors not detected by testing.

## 2021 Technology Industry Outlook

Recognizing the need to maximize resource use and offer fresh ideas, some human services organizations are breaking through longstanding barriers and exploring nontraditional partnerships with each other—both nonprofits and the private sector. The telecommunication market is estimated to expand at a CAGR of ~ 5% throughout the assessment period.

## The future of networking: A guide to the intelligent network

If you would like information about this content we will be happy to work with you. Looking for the latest gov tech news as it happens? The requirements included coverage; a hardened network; dedicated radio spectrum, reliability, resiliency and redundancy; priority access to the network; throughput; group communications; specialized solutions; and a portfolio of devices.

## Next Generation 911

One company raised its telephone-outreach hit rate from 60 to 480 at-risk customers out of every 1,000 calls, and reduced its attrition rate from 24 percent to 20 percent a year. Please email us at: We recommend they focus more on agility and learning than on forecasting and planning, which become less relevant and reliable as technology-driven change continues to accelerate. Robotic Process Automation RPA is a form of business process automation technology based on AI.

## Telecommunications

Satellites and optical fibers, among other technologies, contribute significantly to the globalization of telecommunications services.
