## Maine City Directories: Maine State Library

Polozhentsev and Negrobov 1967 listed 400 insect species that are intermediate and definitive hosts for trematodes, cestodes, acanthocephalans, and nematodes. Note on a parasitic nematode from Codling moth larvae *Carpocapsa pomonella* Lepidoptera, Olethreutidae, Proc.

## History of books

Use of these materials The nature of the NC State University Libraries' Special Collections means that copyright or other information about restrictions may be difficult or even impossible to determine despite reasonable efforts.

## History of books

American Bee Journal 129: 617-619. Right: the underside of a carport roof has been cut away to expose the wax combs of a colony.

## European honey bee

The 70th Anniversary of the birth of the outstanding Soviet scientist, Professor Ivan Nikolaevich Filipjev. Not surprisingly, he considered *Sphaerularia* as a genus inquirendum.

## European honey bee

They are the smallest in physical size of the three castes and their bodies are specialized for pollen and nectar collection.

## Handbook of Vegetable Pests

On insects; hosts for parasitic worms of man and animals Russian. The book also became more accessible to the disabled with the advent of and spoken books. Bringing together writing and art from a variety of sources, HEAL is as a platform where medical students share their growth and

development, where faculty and staff impart their knowledge gained from experience, and where members of the community express how health and healing have impacted their lives.

### **Plant Nematology**

After a short time of further maturation, the remaining daughter queen leaves the colony to mate with about 15 drones. This historical journal is a significant resource for discovering Florida heritage. Use the small arrow to sort A-Z or Z-A on the city column.
