## red de área metropolitana

In such cases, it would be common for the servers to operate without a dedicated display or keyboard.

## Red de Área Metropolitana (MAN)

MAN is made with a combination of several LAN through point to point connections.

## Red de Área Metropolitana (MAN)

Son redes con dos buses unidireccionales, cada uno de ellos es independiente del otro en cuanto a la transferencia de datos. La ventaja de una Red Metropolitana sobre una red Local es evidentemente su mayor rango de acción, teniendo además pocos errores y escaso retardo.

## Metropolitan Area Network (MAN)

Por ejemplo, un banco con varias sucursales puede utilizar una MAN.

## Recommended reading: “Redes Metropolitanas / Metropolitan Networks”

MAN usually involves connection of fiber optics wires to boost data transfer speed.
