Intestinal Protozoa

A large percentage of the vectors for stercorarian trypanosomes eg.

Human parasitology tutorial

However, the organism may be difficult to recognize on stained slides.

Human parasitology tutorial

However, molecular studies first reported in 1986 indicate that genetic recombination occurs in the African trypanosomes within the tsetse vector. Parasites can be viewed as either 'heirlooms', which have evolved from parasites of the ancestors of the current hosts, or as 'gifts' from another animal sharing the same habitat.

Outline of zoology

The infection can spontaneously resolve during either the blood stage or the lymphatic stage.
