Effective Reading Interventions for Kids with Learning Disabilities

It is also a good tool for educating and informing staff and other stakeholders about the program and the evaluation. For quantitative analysis, we reanalyzed data from the program survey datasets using SPSS 16 to confirm the performance indicator data used in this study. We used NVivo 11 to facilitate the data coding process of audio-recorded and verbatim transcribed qualitative data drawn from the program documents and reports.

Techniques to Help Struggling Students
