## What is Archaeology?

Some of the issues are shortly described below.

### Archaeology and Society: Reconstructing the Prehistoric Past

Very minimal damage to the cover including scuff marks, but no holes or tears. It also differs from in that this area studies fossils of extinct species and not humans or human ancestors. Apart from the scientific debate, there is ongoing public discussion proving how important these sites are for many people who do not deal the distant past on a professional level.

### Archaeology and society : reconstructing the prehistoric past : Clark, Grahame, 1907

This can be a small campsite with a scatter of flaked stone indicating tools were being manufactured or modified, or it can be as large and complex as Chaco Canyon with hundreds of structures and millions of artifacts.

### Archaeology and Society: Reconstructing the Prehistoric Past

The majority of pages are undamaged with minimal creasing or tearing, minimal pencil underlining of text, no highlighting of text, no writing in margins.
