Sudbury Basin Nickel Deposits: An Enduring and Extraordinary Resource

Employment Mobility of Miners in Ontario, Canada and Implications for Exposure Assessment in Studies of Chronic Respiratory Disease and Lung Cancer. Financial results in the late 1990s were mixed at Falconbridge.

Nickel

The unions also no longer have the power they once had to negotiate with industry.

CaNickel Mining Limited

For the purposes of a NI 43-101 review a study was completed in September, 2004, by GEOLOGICA Groupe-Conseil Inc. In the last year a lot of people with 25 years of experience never made it to pension because they were let go just to cut costs.

Inco and Falconbridge History

Although a scientist by training, he revealed a natural business acumen, and also gained a reputation for being brash. There is a bronze statue of Stompin Tom in front of the Sudbury Arena.

Progress With Nickel Exploration And Regional Data Acquisition In Brazil

The key informants from industry and labour are only part of much larger number of interviewees and they came to this discussion with very particular viewpoints which are not necessarily reflective of the full dynamic of the changes that have taken place in Sudbury.

Excerpt from a report on an industrial wastes survey of Falconbridge Nickel Mines, Limited, district of Sudbury : Ontario Water Resources Commission. Division of Industrial Wastes. : Free Download, Borrow, and Streaming : Internet Archive

Ritchie was the driving force who really started mining production in the Sudbury Basin with the founding of the Canadian Copper Company in 1886. Nickel is mainly used to make stainless steel: it adds strength and corrosion resistance to the steel, and is also used in types of steel designed

to be less magnetic. As results from this work become available they will be incorporated into the mine design.

The acid rain formula

You can always be bought off. The four focus groups were: 8 retired miners with very diverse mining experience; 5 union representatives; 5 industry employees who were part of a mining health and safety department; and 20 industry health and safety representatives attending a mining safety conference. From 1995 — 2002 Mick Lowe was a regular columnist for Northern Life.

Progress With Nickel Exploration And Regional Data Acquisition In Brazil

More importantly that year, James outmaneuvered his ex-boss and mentor at Noranda, Alfred Powis, to acquire Kidd Creek Mines, a major silver, copper, zinc, and gold producer. It explores the level of awareness of occupational exposures from the perspective of industry and worker representatives in some of the deepest mines in the world. Moreover, South Africa properties began to produce platinum, and the Dominican concessions finally bore nickel.
