The impact on students stuck in the lower track? Chapter Four reviews the literature on deterrence strategies — including harsh punishments for young offenders. We do maintain, however, that it is virtually impossible to draw firm, empirically based conclusions about the effectiveness of programs that have not been subject to proper evaluation. Outline of the Report Any cursory review of the academic literature will quickly reveal that crime prevention programs and strategies come in a wide variety of different categories.

However, unlike proven programs, promising programs may not have been evaluated using the most rigorous scientific standards, they may have produced inconsistent results, or they may not have been replicated in different types of communities.
