Psychological and physiological stress and burnout among maternity providers in a rural county in Kenya: individual and situational predictors

. We examined the data points for irregularities and dropped one data point that was irregular.

Paediatric nurses' general self

Perceived organizational support and psychological contracts: a theoretical integration. We did not test the mediated effect of perceived stress on the physiological measures because they were not correlated in bivariate models. Hair cortisol Cortisol is a downstream hormone secreted by the adrenal glands when the HPA axis is stimulated.

Association between self

Mehrabi Z, Nazari F, Mehrabi T, et al. Sample A convenience sample of paediatric nurses including all the paediatric points of care whether emergency, critical care, or inpatient wards was recruited from 3 Class A tertiary general public hospitals in Jilin Province from July 2018 to November 2018. Perceived organizational support, employee creativity and proactive personality: the mediating effect of meaning of work.

[PDF] Transfer of knowledge between education and workplace settings

A comprehensive overview on stress neurobiology: basic concepts and clinical implications. Patient-Centered Outcomes Research Institute PCORI , listopad 2018. Models were then tested for model fit and collinearity and we removed variables that did not improve the model or were strongly correlated.

Psychological and physiological stress and burnout among maternity providers in a rural county in Kenya: individual and situational predictors

Characteristics of the nursing practice environment associated with lower unit-level RN turnover.

Paediatric nurses' general self

Job satisfaction among hospital nurses: a literature review. Interventions are needed to prevent the stressors where possible, or to help them develop positive coping mechanisms to respond to the stressors. For each respondent, 5 scores are finally reported, one for GH and four others for the sub-scales.
