

# Fixed income portfolio management

## Dow Jones-Irwin - Fixed Income Portfolio Management & Construction Course

Allocation	What we advocate for
 Avoid negative net IG credit	IG credit remains the best alternative; a "sweet spot", as compared to Govies
 Build your Fixed Income foundation	Allocating across FI segments
 Income Generation	Expand the scope for better income opportunities
 On-board Purpose Investing	Avoid biases resulting from management choices or market structure
 Decide your portfolio	Following the year-to-date sell off, investors should find a way to de-risk

Description: -

### Overview of Fixed

Approaches range from pure indexing to enhanced indexing to active management.

### Overview of Fixed

No administration fee applies for invoices covering two or more registrations. Please contact if you have any questions regarding certification.

### Fixed Income Portfolio Management

The Fixed Income Portfolio Management and Construction class introduces the tools and techniques for the management of fixed income portfolios, applying those techniques first to analysing portfolios of real bonds and then to construction and management of portfolios. Please note that while course recordings will be made available to delegates, it is a course requirement that delegates meet the minimum attendance requirements to be eligible for a certificate.

### Overview of Fixed

Less liquid bonds have higher yields, all else being equal, and may be more desirable for buy-and-hold investors. Section 7 describes considerations in managing fixed-income portfolios for both taxable and tax-exempt investors. Complications result from the difference in taxation across investor types, countries, and income sources interest income or capital gains.

### Brightest Most Experienced Professionals

A summary of key points completes the reading. Paragon is built on a standard model principle, with all functionality available to our entire client base. Live sessions: December 6, 7, 10, 13, 14, 15 16.

### Overview of Fixed

Our experience in managing fixed income assets and solid performance record supports the expectation that we can produce lasting value in a

wide range of market environments. The potential for increased returns, however, comes with increased risk.
