Óbirtar mæliniðurstöður frá Tilraunastöð Háskólans í meinafræði. One reason is because the unregulated breast milk market is fraught with risks, such as drugs of abuse and prescription medications being present in donated breast milk. Space does not permit more than an introduction to the proliferation of literature on any specific topic and it has unfortunately not been possible to fully distribute the credit to several groups of researchers working on the same problem.
