You'll be surprised at how many things you can find that will work.

A Beginner's Guide to Leather Working — Gold Bark Leather

Contains some good design patterns and explanations of techniques, however again if you are looking for illustrations to visually explain the techniques I would perhaps look elsewhere, as the visual elements to this book are a bit of a let-down.

You're going to want to make sure that when you put down your granite that you make sure that you aren't going to mark up your table, so consider putting it on top of yesterday's newspaper, or be 100% certain that the bottom is smooth before you set it on your table.

Leatherwork

They aren't going to give it to you for free, but I've only had one place ever turn my away out of hand when I asked if they'd consider selling me their scrap. There are very clear drawings included. I'd think slow and careful application of contact cement with either a brush or roller would be your best bet.

Introduction to Leatherworking : 13 Steps (with Pictures)

They are cheap to buy and cheap to keep fresh sharp blades in. If it doesn't matter enough to you to justify the cost of the tool, then you can use your sanding block or rotary tool to round over the edges, or use your utility knife to round off the corners, both of which are free to do.
