### Menopause Q&A

Doctors will usually start you at the lowest possible dose but you may have to do a bit of to-ing and fro-ing with your GP to find the right medication and dose for you. Neither should women who have had stroke.

### Menopause Questions, Answered

Q: Will a thyroid condition mask hot flashes? That said, every woman is different. Bisphosphonates have replaced estrogen as the primary treatment for excessive bone loss osteoporosis. Some women just tend to have more hair.

### Menopause Frequently Asked Questions

Menopause is not a disease or illness.

### Menogo: Menopause FAQs

About two-thirds of women going through perimenopause and menopause have a harder time remembering things and focusing. Thin cotton clothing may also help.

### Menopause: Your Most Common Questions Answered Blog

These are your type of people: smart, sassy, and supportive. . Chemotherapy with or without surgery can also damage your ovaries and trigger early menopause.

### Menopause

This affects periods and the ability to conceive naturally as well as resulting in the symptoms above. Do I just have to accept that this is my body now, or can I do something about it? Sometimes, especially if you experience these symptoms on the earlier side—say, in your 30s—you might mistake them for a reaction to stress or simply to the bombardment of a busy life, as opposed to the result of hormonal shifts.

## **All your questions about the menopause answered**

Memory problems may be more related to normal cognitive aging, mood, and other factors than to menopause or the menopause transition. Clonidine, which is a really old school antihypertensive blood pressure medication, has been used in the past. After practicing obstetrics for several years, she now focuses on gynecology, with a special interest in health education and menopause.
