Popper insists on falsifiability on the grounds that unfalsifiable claims that rule out no observations are uninformative.

POLITICS AND PHILOSOPHY OF ECONOMICS: MARXIANS, By T. W. Hutchinson **Mint**

The Crisis in Economics, London: Routledge. The view of models to which economists are most attracted is philosophically problematic, because it is apparently committed to the existence of fictional entities whose properties and causal propensities economists can investigate.

But he does not argue that no rules apply. Field experiments have been especially important in development economics where the results of various foreign aid projects have too often provided meagre benefits. Without knowledge of the mechanisms, it is all too easy for an intervention that works splendidly at a specific time and place to fail abysmally when tried elsewhere.
