This model forces publishing houses to get approval from the PRC's government before publication, making publication a long and arduous process for the publisher, further restricting the flow of information. It is estimated a 30 percent annual growth in the number of digital publishing products users in the next few years with the growing popularity of digital technology.

We know them and they know us. The gun enabled lightly trained infantry armed with muskets to more easily kill heavily armored knights for example, and big cannons were able to destroy the strong fortifications all around Europe that were built before gunpowder was known.

Movable type

Wang Yunwu was also an initiator of using modern principles with the famed Four-Corner Classification System

Printing

While in Europe movable metal type soon became cheap enough to replace woodblock printing for the reproduction of text, woodcuts remained a major way to reproduce images in illustrated works of early modern European printing. The method is not strictly printing however, as the pattern is not caused by pressure against the block. This in turn had numerous social implications: because books required enormous effort to produce, they were precious, and far beyond the reach of the common people.
