## Boosting Maths Skills in Deaf Children

Science learning pathways for young children. Fifty-five percent of the 13-year-olds chose either 19 or 21 as the correct response. However, this disorder does not tend to be diagnosed within early childhood, or the first five years of life.

## Academic Catalog

I: The problem of social reality. Topics in Early Childhood Special Education 20 3 :159-173.

## Course Offerings

The Fight for Integration of Black Deaf Education A group of Black Deaf people campaigned to raise awareness about honoring the legacy of a Black mother, Louise B. Further, the knowledge that children build about the natural world is a critical contributor to later achievement not only in science but also in reading Grissmer et al. In addition, development of time concepts may also be addressed through frequent, intentional linguistic exposure, including the use of related vocabulary e.

## The Study of Cognitive Development in Understanding Child Development

NAEP Results Grade 8 Grade 12 Correct response for both claims 1% 3% Partial response 21% 24% Incorrect response 60% 56% Omitted 16% 16% SOURCE: 1996 NAEP assessment. Classroom norms can be established in which students are expected to justify their mathematical claims and make them clear to others.

## Digital transformation to support literacy teaching to deaf Children: From storytelling to digital interactive storytelling

Alibali, 1999; Lemaire and Siegler, 1995; Siegler and Jenkins, 1989.
