## Dynamics of the informal sector in Hanoi and Ho Chi Minh City 2007

But informal work often plays a critical role in giving many women a chance to economically sustain themselves when the formal sector may not. Administrative data and the use of big data also matter. Note: 1999 and 2001 are averages as the WGI were not recorded in these years.

## Dynamics of the informal sector in Hanoi and Ho Chi Minh City 2007

ERROR READ MORE The COVID-19 crisis highlights the interconnectedness and vulnerability of societies and systems at the global level but also of activities perceived as more ordinary, like getting food from farm to table. Indonesia, the largest Asean economy with a workforce of 132m, managed to reduce unemployment despite a decline in annual GDP growth see chart. This is a guest post by John Conroy.

## The Bugiau Community at Eight

They are also more likely to experience labour exploitation and abuse, including unsafe work conditions or harassment, forced overtime, or termination without notice. The security service industry is the fastest-growing business in the country — it is estimated to be worth PGK1 billion and employs approximately 30 000 people. Our survey showed that 18-24-year-olds in Malaysia are far more concerned about their job than the young in the other Asean-5 countries see chart.

## Ch06

For many of us, this means working, paying tax, and being protected with legal and financial frameworks that give us rights and give our employers standards they must uphold. The depth of Malaysia's development is reflected in the size of its formal jobs sector, which employs 88.

## Tackling Vulnerability in the Informal Economy

To date, many gardens have grown well beyond the confines of the allotments, while others have been established away from the house - a fact that clearly indicates the insufficiency of the allotted plot size. The report also stated that more than K12 billion unbanked money circulates in the

informal economy yearly and it is not a surprising figure but something that needs to be taken into consideration in finding means and ways or alternatives in how to go about securing this huge capital and get it into the banking system. This is impressive considering that most of the food consumed by lower-income groups consists of imported rice, meat, and fish.

### **Coronavirus: Improving resilience in West African food systems**

The policy goal is to maximize trade and investment by increasing exports, to reduce imports, and to increase foreign direct investment FDI. The current completion rate of primary school in Papua New Guinea is 59 per cent. West African governments are responding to Coronavirus COVID-19 by closing borders, banning foreign travellers, closing schools and implementing curfews to stop the spread of the virus.

### **The future of Papua New Guinea: Old challenges for new leaders**

It is centrally concerned with original studies based on sustained ethnographic research, but review articles and theoretical papers which integrate and interpret anthropological knowledge about its central concern are welcome. Normalizing the data, by dividing the budget balance by GDP, enables easy comparisons across countries and indicates whether a national government saves or borrows money. Agriculture provides a subsistence livelihood for 85% of the people.
