## 14 Supply Chain Trends for 2021/2022: New Predictions To Watch Out For

Disrupting societies will become more common, with long-range precision weapons, cyber, and robotic systems to target infrastructure from afar, and more accessible technology to create weapons of mass destruction. Kondapalli, in contrast, emphasizes unresolved sovereignty and territorial disputes, terrorism, and the challenge of maintaining high economic growth as critical for India.

## Cultural Understanding and Global Thinking in Business

No government, international organization, or other form of institution acting alone can solve the problems described in this report: climate change, cybersecurity threats, organized crime, rich—poor gaps, environmental pollution, international finance, gender discrimination, changing disease situations, and the need for sustainable development.

## Near Future: Tensions are Rising

The Global Economy Is Shifting Economies worldwide will shift significantly in the near and distant futures. A cloud-based shipping software built to help ecommerce businesses streamline local and international shipping.

## Geopolitics and International Security

Global leadership hinges on state power, but also on the appeal and legitimacy of the ideals and principles that Great Powers embody and project. Climate change is, in many areas, impacting food availability and the kinds of patterns you would expect to see in society such as land ownership, pastoralism, and so forth. The proliferation of these capabilities will shift warfare from direct clashes of opposing armies to more stand-off and remote operations, especially in the initial phases of conflict.
