Psychotherapy functions under formation of therapeutic relationship which is confidential, interpersonal and dynamic in nature. Some scholars suggest that violence may prime thoughts of hostility, with the possibility of affecting the way we perceive others and interpret their actions. The therapist normally has the client make a list of all the things that produce anxiety in all its different forms.

RECIPROCAL INHIBITION AS THE MAIN BASIS OF PSYCHOTHERAPEUTIC EFFECTS

Systematic desensitization, though successful, has flaws as well.

Desensitization (psychology)

This book owes especially much to Pavlov and to Hull. Else a very clean and tight copy.
