## Knowledge, Attitude and Practices of Diabetic Patients in the United Arab Emirates

However, our study shows a clearer discrepancy between health investment and outcomes than does past research. Patients perceptions of their illness: the dynamo of volition in health care. We used data from a special survey of DM-diagnosed persons, who had responded to previous waves of the Health and Retirement Study HRS , a longitudinal database.

## Conceptual Model of Diabetes Self

Competing interests: The authors have declared that no competing interests exist.

## Conceptual Model of Diabetes Self

Patel N, Kennedy A, Chew-Graham C, Blickem C, Bower P. Bickel, Odum, and Madden 1999 , however, using a much smaller sample of younger individuals, reported that smokers do have higher discount rates than nonsmokers.

## Preferences, beliefs, and self

Another barrier is that the referral to diabetes education must come from the primary care provider. The impact of migration on cardiovascular disease and its risk factors among people of Indian origin. Exclusion Criteria The articles were excluded if their focus was theoretical research only and were not related to diabetes self-management but otherwise related to diabetes.

## Illness beliefs and the sociocultural context of diabetes self

All statistical tests were performed using 0. Smith, Taylor, and Sloan 2001 , using data from the HRS, reported that people make quite accurate predictions of their own longevity.

## **Every Person with Diabetes Needs Ongoing Self**

However, the interviews revealed more and potential problematic information that did not have a strong evidence base. Participants with greater control beliefs had a better health status in the quantitative study.

## **Self**

Findings indicated that a majority of participants used regular exercise, medications, and dietary modifications as a core components model of diabetes self-management. Baseline disease knowledge assessment in patients with type 2 diabetes in a rural area of northwest of Pakistan.

## **Every Person with Diabetes Needs Ongoing Self**

Ozcelik F, Yiginer O, Arslan E, Serdar MA, Uz O, et al. Quality of diabetes care in community health centers.
