

Teaching research methods in the social sciences

Ashgate - Research Methods in the Social Sciences : Social Science 366 : Courses : Athabasca University

Course Syllabus																																																							
1. Program of Study	Bachelor of Arts (Social Science)																																																						
2. Faculty/Department/College	Michael G. Coates International College																																																						
3. Course Code	RSOC 366																																																						
4. Number of Credits	3 Credits (Table 1-1)																																																						
5. Prerequisite(s)	None																																																						
6. Type of Course	Core course																																																						
7. Term(s) / Academic Year	Term 2, every year																																																						
8. Course Description	An introduction to the scientific method and its use in social science research. Examination of theory, methods, data collection, survey techniques and hypothesis formation and testing.																																																						
9. Course Objective(s)	(1) To introduce the method of social science research. (2) To develop the various techniques for conducting research. (3) To enable students to apply social research.																																																						
10. Course Outline	<table border="1"> <thead> <tr> <th>Week</th><th>Topic</th><th>Hours</th><th>Instruction</th></tr> </thead> <tbody> <tr> <td>1</td><td>Introduction to social research: Quantitative and qualitative approaches</td><td>4</td><td>Lecture/discussion</td></tr> <tr> <td>2</td><td>Quantitative research methods</td><td>4</td><td></td></tr> <tr> <td>3</td><td>Quantitative research continued</td><td>4</td><td></td></tr> <tr> <td>4</td><td>Qualitative research methods</td><td>4</td><td></td></tr> <tr> <td>5</td><td>Qualitative research continued</td><td>4</td><td></td></tr> <tr> <td>6</td><td>The experimental method</td><td>4</td><td></td></tr> <tr> <td>7</td><td>Qualitative methods</td><td>4</td><td></td></tr> <tr> <td>8</td><td>Participant observation</td><td>4</td><td></td></tr> <tr> <td>9</td><td>The interview group focus</td><td>4</td><td></td></tr> <tr> <td>10</td><td>Content analysis</td><td>4</td><td></td></tr> <tr> <td>11</td><td>Qualitative methods: Research proposals</td><td>4</td><td></td></tr> <tr> <td>12</td><td>Total</td><td>48</td><td></td></tr> </tbody> </table>			Week	Topic	Hours	Instruction	1	Introduction to social research: Quantitative and qualitative approaches	4	Lecture/discussion	2	Quantitative research methods	4		3	Quantitative research continued	4		4	Qualitative research methods	4		5	Qualitative research continued	4		6	The experimental method	4		7	Qualitative methods	4		8	Participant observation	4		9	The interview group focus	4		10	Content analysis	4		11	Qualitative methods: Research proposals	4		12	Total	48	
Week	Topic	Hours	Instruction																																																				
1	Introduction to social research: Quantitative and qualitative approaches	4	Lecture/discussion																																																				
2	Quantitative research methods	4																																																					
3	Quantitative research continued	4																																																					
4	Qualitative research methods	4																																																					
5	Qualitative research continued	4																																																					
6	The experimental method	4																																																					
7	Qualitative methods	4																																																					
8	Participant observation	4																																																					
9	The interview group focus	4																																																					
10	Content analysis	4																																																					
11	Qualitative methods: Research proposals	4																																																					
12	Total	48																																																					
11. Teaching Method(s)	Lecture and discussion

localize-img.justnote.me: Teaching Research Methods in the Social Sciences (9780754673545): Garner, Mark, Wagner, Claire, Kawulich, Barbara: Books

A qualitative approach, such as conducting interviews or content analysis of archival texts, can yield exciting new insights about a research problem, but it should not be undertaken simply because you have a disdain for running a simple regression. Students will have the opportunity to learn via a variety of methods including learning through teaching, where pairs of students will lead short learning sessions, and learning through research where students will design and implement short research projects.

Different Methods of Social Science Research

And they even meet here at the same place. Study questions at the end of each chapter encourage students to think critically about the research process and how the choices a researcher makes will broaden or constrain what they can find. Psephology is the analysis of voting data, opinion polls and similar electoral statistical data.

Common Methods Used in Social

Important terms, related activities and further reading suggestions are also included. Chinese Department, University of Leiden, Netherlands. Qualitative research relies on human accounts and experiences to explain the why and how of various phenomena.

Social Research Methodologies

The APA Style format was developed exclusively by the APA and is set forth in the Publication Manual of the American Psychological Association APA Publication Manual. Important Information Whilst the University will make every effort to offer the courses listed, changes may sometimes be made arising from the regular review of course programmes.

Different Methods of Social Science Research

This white paper aims to contribute to the small but growing body of literature on best practice and tips for developing curricula and teaching social research methods and data science online by sharing experiences of the team who developed.

Common Methods Used in Social

ΓÇô This is information gathering such as through surveys, opinion polling, questionnaires, or focus groups. There is little academic research available on how social research methods and data science skills are being taught online and how digital technology is used to support delivery of course content and pedagogic approaches, strategies, tactics and tasks. So content analysis generally tries to stay on a level of looking for patterns in the surface meaning where there's a minimum of interpretation.
