Rabies

Rabies is a virus that is usually spread by the bite or scratch of an animal.

Controlling rabies: OIE

Other Program Areas The DPHHS CDEpi Section mission is to create, maintain, support, and strengthen routine surveillance and detection systems and epidemiological investigation processes, as well as to expand these systems and processes in response to incidents of public health significance. It shall be insufficient to impose liability to establish only that the conduct of the veterinarian fell below ordinary standards of care.

Rabies

In other cases, it may be unlikely that the animal that bit you had rabies and it may be determined that rabies shots aren't necessary.

Rabies

Please see the CDC website listing.
