## Proved Oil Reserve

Consequently, in 2000, the company discovered two gas fields, Gaza Marine 1 and Gaza Marine 2, to have potential gas reserves of 1.

## The world's biggest natural gas reserves

FILE PHOTO: General view of a facility of Dutch gas production company NAM in Farnsum, Netherlands August 28, 2018. For the best analysis of the information included in Fig. The existing onshore fields such as Anaco, Barrancas and Yucal Place are being developed for increased gas production.

## Groningen gas field

Production was expected to start in December 2017, . The field is jointly owned by Equinor Energy 33. Oil is a flammable liquid that can be refined and turned into gasoline.

## natural gas

However, production increases mainly to meet domestic market needs in many regions, and in some cases such as China or South Asia, cannot keep pace with the strong demand growth rate.

## Groningen gas field

As for the other three fields, in which work has not started yet, they will contain 12 natural gas wells according to the company. Overall, increases in annual and total changes were observed in global coal consumption in the period of 1995—2015, and lower but positive figures for annual and total increases are predicted to occur in the period of 2015—35.

## **The Rise of Natural Gas Generation in Europe**

These two nations are by far the biggest contributors to natural gas production on the planet. A telling factor is the evolution of gas plant capacity factors, Abani noted, specifically in three countries: Italy, the UK, and Portugal. In a , Deputy Premier Novak underlined that a tripling of LNG production in Yamal is planned over the next 15 years.

## **How Biden may save U.S. gas exports to Europe**

Most of natural gas reserves of the country are located in the Niger Delta. Estimates indicated this industry alone employs almost 6.
