### Textured Leaf Rubbings that Really Work!

There are differing views as to whether lichens damage the stone on which they are growing or whether they protect it.

Download it today and get started on your own adventures! Set the Pellon on the ironing board with the crayon side up, put foil under the Pellon to protect the ironing board and wax paper waxy side down on top of the crayon. TRANSPORTATION ISSUES If you have a general idea as to the size of the stones that you will be rubbing, you could pre cut your rubbing papers of choice at home and carry them in a paper or plastic mailing tube. They tend to be thinner than marble, but are mostly unaffected by the acid rain.

Another way to use this technique allows to enrich areas and details of drawings and paintings with textures or graphic motifs. You will have every law enforcement agency in the country checking your personal history and watching your every move. Any small cracks present or caused by this process will probably be infiltrated by the fine root-like hairs fungal hyphae of the lichen and this may cause more damage.
