New York Power Authority to upgrade Grand Central Terminal platform lighting with energy

Quiniones GQEnergy is the President and Chief Executive Officer of the New York Power Authority. The town is very thankful to all agencies that worked cooperatively to bring this project to the Town of Skaneateles.

20201203

Quiniones, NYPA president and CEO. Housed in Albany in partnership with the Colleges of Nanoscale Science and Engineering, NYEM, is a comprehensive network and decision tool that utilizes Big Data analytics to monitor and troubleshoot buildings to reduce energy waste. More than 80 percent of the electricity NYPA produces is clean renewable hydropower.

20200117

Throughout this effort, we have been inspired to explore a range of strategies and to become bolder and more creative in our approach and our message.

Energy Efficient Lighting Project Reduces Greenhouse Gas Emissions • News • Purchase College

The electric power industry is undergoing a sea-change, largely driven by unprecedented advances in technology. You have gathered here today to celebrate the delivery of the first power from the fabulous Niagara Power Project and I am happy to join with you, your fellow trustees, staff, consultants, contractors and workers, in this field, in welcoming this great achievement.

New York Power Authority announces completion of lighting upgrades at Niagara Falls Housing Authority

The results have been astonishing even our energy experts think so! It is important now, more than ever, to have qualified suppliers working with us to help us implement our strategic vision. About 15 weather sensors will be installed on NYPA lines along the 70-mile Moses-Wills-Plattsburgh transmission circuit and the WindSim Power Line Optimization Solution WPLS system will be demonstrated on a NYPA server. In an effort to

reduce the potential for underground cable leakage and prevent fault problems, this project will demonstrate and evaluate a real-time system that will monitor cathodic protection and assess dissolved gas analysis DGA of high pressure fluid-filled HPFF cables.

20200117

REV is building a cleaner, more resilient and affordable energy system for all New Yorkers by stimulating investment in clean technologies like solar, wind, and energy efficiency and generating 50% of the state's electricity needs from renewable energy by 2030. The program advances Governor Cuomo's Green New Deal, a nation-leading clean energy and jobs agenda that will aggressively put New York State on a path to economy-wide carbon neutrality.
