### In Depth

It will remain visible for the next 12+ months as it dawdles along in its orbit, falling further and further behind until it is on the opposite side of the Sun from Earth and we can no longer see it. Around 18:40 you'll be able to look up and to the left of Mars to see a set of fuzzy, twinkling pinpricks. And in 2012, Steltzner's last big project, the Curiosity rover, landed on the Red Planet.

### Mars is coming close to Earth tonight

PALCA: Well, this rover was sent to a place called Jezero Crater, which is a home for a lake, but the lake hasn't been there for 3. Perseverance is expected to touch down at around 8. She asks her husband for a cigarette.

### Mars at night: How to see the Red Planet at night all month long

Experts say it likely has the consistency of a soft, rocky paste. This happens about once every two years. Everest with a base the size of the state of New Mexico.

### What's Up: Skywatching Tips from NASA

You can hear more about the three Mars missions arriving at the red planet in February in the first episode of our new podcast, — the world explained by experts.

### Mars Opposition 2020: Where and When to See The Red Planet

This is a great time for viewing the planet, partly because spotting it is so simple. Giant Jupiter especially influences the orbit of Mars. Final Thoughts Now is a great time to observe the Planet Mars from your own backyard.

### Stunning photos of Mars as it makes close approach to Earth

And if there was, maybe it would leave some sign left behind that the rover could detect in the rocks. After such storms, it can be months before all

of the dust settles.

### **See Mars Now: Red Planet Shines Bright**

Look for Mars in the East on October 13th, 2020. The Red Planet goes through periods of intense brightness, followed by years when it is fairly dim. Just keep in mind poor, cloudy weather and light pollution can hinder your efforts.

### **Mars Opposition 2020: Where and When to See The Red Planet**

Mars is moving westward through the stars of Gemini and will cross over into Taurus on Dec.
