Railway Labor Executives' Association

With the removal of restrictions, construction companies still plan to recruit the required number of workers. In addition, most labor union strength was in new industries: more than 75 percent of the workers in transportation, communication, and the manufacture of transportation equipment were union members; two-thirds of employees of paper, primary metals, and chemical manufacturers were unionized; and more than half of those working in the petroleum industry were organized. The financial path forward is full of crooked tracks.

Railway Labor Executives' Association

The RLEA, along with the AFL and the CIO, met with non-leaders of European trade unions to create a Trade Union Advisory Committee that acted as a policy-making body on labor matters in Western Europe. Although there was some internal dissatisfaction with this involvement, integration within most unions was accomplished smoothly. Did you manage to implement your plan? Later in 1942, the federal government created a labor policy advisory group on which a representative from the RLEA sat.
