Structure and tectonic history of the eastern Panama Basin

Black walnuts will have pith arranged in horizontal layers, with larger spaces between the layers.

General Plant Identification

On the end grain or a cross section of the log under the microscope, vessels appear as holes and are known as pores. Good workability, but make sure to keep the wood cool. Burmese Blackwood: Not a very common wood in western markets, Burmese blackwood is a very interesting wood.

Hardwood Anatomy

By HSC III knives Tulipwood is similar to kingwood in its striation, but it has white and bright pink instead! It is said ebony should be treated like black ivory, so use fresh belts and sharp tools.

Structure and tectonic history of the eastern Panama Basin

You can use this guide when repotting an orchid that has no label and if you are unsure which genera it is.

wood identification

The following examples show what variations you can expect to find.
