## Impact of socio

For example, a change agent can help farmers make the transition from growing wheat to more complicated but lucrative opportunities such as raising tomatoes, vegetables, and orchard crops. The proportion of forested land in Chongqing declined from 19% in the early 1950s to less than 10% in the 1960s and 1970s, but has maintained a constant increase since the 1980s and reached 34% in 2008 Chongqing Bureau of Statistics.

## CAB Direct

Although the social and economic ramifications of this reform are still unfolding, a better integration of urban and rural areas and progressive adjustments in the household registration system may bode a gradual shift from temporary or circular labor migration to permanent settlement in cities for rural migrants. Credit Participation in the Past Two Years Borrowers 190 65. Data were collected using a structured questionnaire.

## The Transformation of Traditional Agriculture: A Case Study of Punjab, India on JSTOR

It takes management over time. Therefore, the development of the agriculture sector is an indispensable policy challenge for the government of Afghanistan.

## The Transformation of Traditional Agriculture: A Case Study of Punjab, India on JSTOR

Active labor members of farming households also tended to be older and less educated than those of the other two groups. Poorly managed wastewater treatment substantially affects water quality leading to multiple health impacts.

## **Rural**

This choice dramatically increased the income opportunities for small farmers and has led to an average land productivity increase of 30 percent. *Acta Ecologica Sinica* 26 9 : 3144—3151 in Chinese. I am very grateful to my advisor Courtney Flint and dissertation committee members Jeffrey Dawson, Futing Liao, and Stephen Gasteyer for their insightful guidance throughout this project.
