## Basics of Crop Insurance

Over 100 commodities are insured such as perennials crops not planted every year such as apples, citrus , livestock cattle, lambs , apiculture beekeeping , clams, rangeland, pasture and oysters. Vegetation Index — VI No longer used in crop insurance, an index which measures vegetation greenness used to estimate plant conditions. Premium rates and insurance terms and conditions are established by the Federal Crop Insurance Corporation FCIC for the products it develops.

## Crop Insurance 101

In 1938, the Federal Crop Insurance Corporation FCIC was created to carry out the program. The date is found in the Special Provisions or as provided in section six of the Common Crop Insurance policy. Companies and agencies compete with Crop Insurance knowledge, customer service, and related insurance products.

## Home

Most private coverage may be added to a crop to supplement coverage under the Federal Crop Insurance policy. It is typically 45 days from the cancellation date unless otherwise noted in the Special Provisions. Whole farm units are exactly what the name implies.

## Crop Insurance 101

KCBOT — See Kansas City Board of Trade LAF — See Loss Adjustment Factor LAM — See Loss Adjustment Manual LASH — See Loss Adjustment Standards Handbook Late Planting Period — LPP The late planting period begins after the final plant date, and it lasts for 25 days. Numerous years of APH data is collected to determine averages and premiums.

## Crop Insurance and How It Works

Ineligible Tracking System — ITS A system used to track producers who cannot participate in crop insurance programs. Actual Yield — AY The amount a specific crop produces.
