The People's Guide to Mexico: Living in San Cristobal

When wives complain, men often argue in their own defense that they have a right to spend the money that they earn.

Chiapas highlands

It draws on research in which I have been using the approach of geographic information systems GIS to compile data relating to agrarian change in southeastern Mexico over the past half century, as a way of contextualizing case studies in the central highlands of Chiapas. The end result leads us to the conclusion that in 1990, there were 1,129,826 persons classified as Indian or indigenous speakers, which represented 35. In a 2010 paper, Hirotooshi Yoshioka of the University of Texas demonstrated that children of bilingual primary school graduates are significantly less likely to retain the indigenous language than those of monolingual uneducated parents.
