Creating a statewide greenways system (1994 edition)

Acre for acre, agreements like that are cheaper than outright purchase, and could be favored by state officials trying to protect the most land for the lowest cost. Please be sure you are using the best available data.

Bill to protect Florida Wildlife Corridor becomes law

To best view and use this dataset, the most updated version of existing conservation lands from Florida Natural Areas Inventory or available through FGDL should be used as an overlay. Make sure you are familiar with your data before using it for projects or analysis.

Chapter 260

Proceedings of the first ECNC seminar on land use change and its ecological consequences.

Florida's Greenways and Trails

A lot of potential Florida Forever projects are evaluated through a scoring system for a system called the Florida Ecological Greenways Network, which is a basic way for evaluating potential wildlife corridor projects. Those eligible to represent the greenway user community shall be chosen from, but not be limited to, conservation organizations, nature study organizations, and scientists and university experts. As ecological network planning means biodiversity management outside protected nature reserves and parks, it also means confrontation between interests and finding ways for cooperation between all users of the wider landscape.

FLORIDA ECOLOGICAL GREENWAYS NETWORK CRITICAL LINKAGES

Regional Greenways Task Forces reviewed the results and suggested modifications July 1997 - May 1998 and public hearings were held October 1997 and June - July 1998 where further modifications were suggested. Gainesville, FL: University of Florida, Department of Landscape Architecture and GeoPlan Center, Department of Urban and Regional Planning. These greenways also create linkage between conservation areas

for wildlife to travel safely.
