This figure is higher than for women who started out in any other occupation, although sales occupations are close behind. Kaneki initially only entered this state when he was under extreme duress or near-death and later included during calm settings for conversation. To reiterate, women face three types of uncertainties: 1 possibility of dismissal due to pregnancy and other family-related contingencies; 74 Margarita Estévez-Abe 2 loss of income during work interruptions; and 3 declining skills during work interruptions.

Kyouko Kaneki

Tokyo: Nihon Keizai Hyoron sha. This produced smaller cohorts of young women entering the labor force from the mid-1950s on.

english

When institutions do little to level the playing field Gendering Capitalism 73 for women to overcome the bias, they de facto exacerbate occupational segregation by gender. The traditional male bookkeeper was an experienced generalist who at any given moment could report to his boss on the state of the business. The data set I use here is the 1998 National Survey of Family in Japan hereafter, NSFJ, a nationally Women in Japan 41 representative survey on family in Japan, conducted by the National Institute of Population and Social Security Research.

Français

As far as married women are concerned, the belief that mothers should stay at home and take care of small children was still predominant even in the late 1990s. Unions, Employers, and Central Banks. As he rescues Hinami from her cell, he reveals his own motives that have not changed since the Tsukiyama Investigation.

Japonais

This is not meant to be a complete or exclusive explanation, but one that nevertheless accurately captures some of the big patterns of human life. This chapter is particularly interested in two puzzles that emerge: 1 Why have liberal welfare states, with their scant support for working women, achieved high levels of gender equality? The VOC literature has improved our understanding of how different market economies operate.

Français

Even among the younger generation, a majority supports the idea that mothers should devote themselves to their children when they are younger than three.

Français

The opportunity to work in the clerical sector was especially important for white middle-class married women, as factory and domestic service jobs were viewed by the majority of these women and their husbands—as well as by some working-class families—as beneath their dignity Cohen 1992; Degler 1980; Goldin 1990. Gender and Family Issues in the Workplace.
