P3402: Precambrian Geology, Bannockburn Area

These data augment Preliminary Map P. The data are available on 1 CD. Geological, geochemical, petrographic and isotopic data available as Miscellaneous Release—Data 381 see below.

Publications Release Notice — April 29, 2021

If you notice errors in the data please. The Aggregate Resources of Ontario—2020 or ARO—2020 is available as a direct download from OGSEarth. MacDonald, scale 1:20 000, colour.

Physical Volcanology and Genesis of Komatiite

The project was undertaken to 1 update knowledge of the local Archean and Proterozoic geology using modern mapping, geochemical and geochronological techniques, and 2 produce an updated genetic model for the greenstone belt that may be used as a framework for more detailed academic and mineral exploration activities. A user document and readme file that explains the GIS content is provided.

Physical Volcanology and Genesis of Komatiite

Ministry Contact Information For detailed information regarding this mineral deposit please contact the Southern Ontario Resident Geologist.
