Latvijas Republikas Ministru Kabinets: Tiesību aktu projekti

David A Dyker is currently Senior Lecturer in Economics at the School of European Studies, University of Sussex. Had that movement been complete, Micawber could have disappeared quite painlessly.

Restructuring the Soviet Economy

Certainly the system failed to penalize, and perhaps even encouraged, wasteful use of material resources.

Restructuring the Soviet Economy

In other words, western managements perceive that under PBR conditions workers have an incentive to conceal capacity, and try to solve the problem by observing output trends very closely; the workers realize that and tailor their output trends accordingly.

Latvijas Republikas Ministru Kabinets: Tiesību aktu projekti

Let us start by looking at decentralized investment.

Latvijas Republikas Ministru Kabinets: Tiesību aktu projekti

As we noted in Chapter 1, the traditional planning system was remarkably simple in terms of how the line of command operated.

Restructuring the Soviet Economy

But there was still no clear break with the Brezhnev style of policy-making, a style that had continually fudged the distinction between experiments

and generally legislated change in such a way as to make any monitoring of policy implementation almost impossible. It was modified very significantly in the peripheral areas of radical marketization, but once again we have to say that even in potential terms this was very small beer. Rather than just disaggregating down to the intermediate level and leaving the ministries to do the rest, Gosplan was responsible for production planning right down to the level of individual commodities.

Latvijas Republikas Ministru Kabinets: Tiesību aktu projekti

With limited and clearcut priorities and abundant resources this could almost be an advantage, but as the strategic emphasis moved more in the direction of balanced growth and the resource availability situation tightened, so the need to evolve some kind of synthetic indicator, which would reflect all key aspects of that cycle, intensified. With the wholesale introduction of new technologies from the west, furthermore, the production possibility frontier was being moved outwards all the time. The conservative interpretation of direct links was to be universalized by 1980.
