### Existential Art Therapy: The Canvas Mirror by Bruce L. Moon

A classic in art therapy literature since its introduction nearly two decades ago, this book is an expression of the author's desire to link the practice of art psychotherapy to the core issues of life as presented in existentialism. The current state of mental health care, with short stays and a problem-focused approach, makes this book even more relevant today than when it was first published in 1990. The primary weakness that I would identify is that Moon does not engage deeply with the contemporary existential literature.

### Existential art therapy (2009 edition)

The inclusion of existential in this book's title denotes an interest in human struggle with issues of life in the face of death.

Some might see this as a negative, as the theory is not as well developed, but I enjoyed this. The Canvas Mirror is the story of connections: the author's connections with his patients, their connections with each other, and, ultimately, the author's connections with the reader.

Replete with numerous illustrations, this text will serve as a valuable resource to medical and mental health professionals, occupational therapists, artists, students and theorists of art, and rehabilitation professionals. We are provided in this book with a philosophy of how to be rather than a manual of what to do. Moon is a good storyteller and the majority of his stories are nice illustrations of the practice.
