## Family satisfaction with nursing facility care

As we assert above, collecting satisfaction information from family members has fewer potential barriers than collecting equivalent information from residents, and as such represents an attractive option.

## Is preexisting mental illness associated with lower patient satisfaction for older trauma patients? A cross

Ethics approval and consent to participate The study received approval by the Hamilton Health Sciences - McMaster University research ethics review board, Hamilton, ON Canada.

## Assisted Living

This checklist comprises nine boxes, each rating a specific psychometric property. One open-ended question was included to gather any additional comments from respondents. .

## Small is beautiful? Explaining resident satisfaction in Swedish nursing home care

A nationwide VA palliative care quality measure: the family assessment of treatment at the end of life. Another focus will be the refinement and testing of items that did not perform well enough to be included with this set; these items address topics that are pertinent to this population, such as coordination of care and the use of personal care assistants.

## Medicaid Estate Recovery

Conclusion This review identified several comprehensive surveys aimed at measuring the experiences of end-of-life care, covering a variety of content areas and practical issues for survey administration.

## **Measuring Family Members' Satisfaction with End**

Focus areas include discharge, mobility, and activities of daily living.
