Artemisia id est mater herbarum vel matricaria latine grece tagates, arabice vero leptafilos ; Arthemisia herba est fructuosa similis absinthio vel abrotano sed vastior est et foliis latior sed aspectu fere talis non est albi coloris ut absinthium, est habens gravem odorem, gustu amara, hastas habet longas, florescit estatis tempore floribus similibus floribus camomille grave olentibus et amaris, nascitur maxime locis maritimis, est calida et sicca in secundo gradu et dicitur arthemisia quia sic vocabatur uxor regis Masoris qui voluit eam sic vocari. Researchers have increasingly turned to traditional medicines to provide clues as to which natural products to investigate, but the oral traditions on which much of this medical knowledge rests are often unstable.
