Captions are available on this Academy module. In a market, buyers and sellers come to a common platform on which the buyer buys goods and services from the seller for money.

What is a Financial Market?

In essence, this is akin to sophisticated data mining. Insurance companies pay a certain amount to the immediate family members of the policyholder in the event of the premature death of the policyholder. However, the majority of trading in these commodities takes place in derivatives markets that use spot commodities as underlying.

The views and strategies described may not be suitable for all investors. The summary and full prospectuses contain this and other information about the mutual fund or ETF and should be read carefully before investing. Derivatives are secondary securities, the value of which is determined solely by the value of the primary security to which they are linked.
