**Pierre Rémond de Montmort (1678**

Both ' paper and knowing that had written an unfinished work in probability seem to be the main influences on Montmort. Rémond decided that he should make his peace with his father. Rémond went on to study the latest mathematics, in particular studying algebra and geometry with M Carré and M Guisnée.

**Datei:Montmort**

There were frequent epidemics, the one that struck Paris in 1719 killed 14, 000 of the inhabitants of the city. About 30% of those affected died from the disease.

**Essay d'analyse sur les jeux de hazard**

His advice to his son Pierre was that he should study law and François had everything organised for his son with a vacant magistracy ready for him to step into after he had qualified.

**Essay d'analyse sur les jeux de hazard**

After his death his paper on summing infinite series, De seriebus infinitis tractatus A tract on infinite series , was published in the Philosophical Transactions of the Royal Society.
