

# Vulnerable brain and environmental risks

## Plenum Press - Health Effects of Exposures to Mercury

Description: -

- Land grants -- Virginia.

Readers

Protein-Energy Malnutrition -- complications.

Neurotoxins.

Nervous System Diseases -- chemically induced.

Environmental Exposure.

Neurotoxicology -- Environmental aspects.

Neurotoxicology. Vulnerable brain and environmental risks

-Vulnerable brain and environmental risks

Notes: Includes bibliographical references and index.

This edition was published in 1994

### Environmental Factor

Both inorganic and organic mercury are absorbed through the gastrointestinal tract and affect other systems through this route. This column provides a snapshot of the environmental justice issues that communities of color across the country face every day.

### Early Childhood Mental Health

A Yale University found that non-Hispanic whites had the lowest exposure rates for 11 of the 14 pollutants monitored in the study. People who feel lonely may also have weakened immune cells that have trouble fighting off viruses, which makes them more vulnerable to some infectious diseases, he added.

### Social isolation, loneliness in older people pose health risks

Put simply, adults could visualize the prospect and respond immediately, while teens had to mull it over, Baird suggests. But, when mice known to have a genetic predisposition to characteristics of mental illness were similarly isolated, they exhibited behaviors associated with mental illness, such as hyperactivity. This search feature obtains best-matches with the terms you choose, and shows an overall score based on the scientific rankings.

### Effects

Moreover, there is increasing evidence that, despite a range of genetic risks for addiction across the population, exposure to sufficiently high doses of a drug for long periods of time can transform someone who has relatively lower genetic loading into an addict. A baby can become trapped and suffocate between the headboard slats, the space between the mattress and the bed frame, or the space between the mattress and the wall.
