Military 'live tissue trauma training' using animals in the US

This course is integrated in the 3-month training period of medical officers. The Medical Emergency Response Team MERT was an innovation from early in the Iraqi conflict, when it was decided to install senior decision making as part of prehospital care.

Trauma Management: For Civilian and Military Physicians

This effort hopes to increase the communication, integration and planning across the NCR to ensure the best trauma system response occurs should there be a large-scale disaster. The final aspect of the preparation phase is to insert surgical teams within the hospital management infrastructure.

Military 'live tissue trauma training' using animals in the US

. Surgical residents at Hamilton openly expressed their opposition to the changes, as they considered the new simulators as poor replacements in their training when compared to their previous experience using live pigs.

Military 'live tissue trauma training' using animals in the US

For a military trauma anaesthetist, this starts as a trainee and continues as a deploying consultant delivering care, who then returns after deployment to train the next generation. Endoscopy and other associated training techniques have also been used as part of LTTT.
