The Sassanids held on to their new gains for 150 years as both Rome and Persia changed from ancient to medieval states.

A Short Summary of the Persian Wars

The people of Athens had fled.

Tip of the Week

The Sassanid state collapsed not long after the Arab victory at the Battle of Qadesiya in Iraq in 637. After recovering the legionary standards lost at Carrhae and the Roman prisoners who were still alive would come the re-establishment of Roman prestige in the East. After the battle, the Athenian army ran the 25 miles back to Athens in order to prevent the Persians from attacking the city.

Persian Campaign

At Plataea, the largest battle of the war, 100,000 Persians were defeated by 40,000 Greeks, including Athenian and Spartan hoplites.

Scythian campaign of Darius I

Although Persia had thrashed two huge Roman armies, it too had lost its taste for war, perhaps because victory had taken its toll of manpower and finances. Earlier Athens had discovered a silver mine, and Themistocles convinced the Athenians to build warships with its new-found wealth. When German agents tried to arouse the southern tribes against the British, Britain created an armed force, the South Persia Rifles, to protect its interests.
