## BHL: William Warner Bishop Papers

As of 29 March, nearly 90% of the world's learners were impacted by closures. Typed notes from 1881 articles from the Saguache Chronicle. What Ideas do Women have about ANC and why do they Attend at All? School closures were shown to reduce from the by 90% during the 1957—58 outbreak, and up to 50% in controlling influenza in the US, 2004—2008.

## Joseph Gallio Masters Collection

Two prints plus negative Letter from DWW to Joseph Kincaid regarding early wheat crop. A hand-full of studies employing qualitative research methods, such as in-depth interviews, focus group discussions and participant observation, have however directly tackled ANC attendance in sub-Saharan —.

## archives.localize-img.justmote.me

Three letters to DWW regarding his presentation of a paper at the Southwestern Division meeting to be held in December 1925.

## Factors Affecting Antenatal Care Attendance: Results from Qualitative Studies in Ghana, Kenya and Malawi

At health facilities, communication tended to be more two-way if a woman was comparatively wealthy or well educated or had a familial relationship or friendship with the health worker. The bulk of the chronological file consists of letters addressed to Mrs.

## **Joseph Gallio Masters Collection**

In light of the paucity of research and absence of comparative studies, drawing on the results from a programme of qualitative research, this paper explores the factors affecting ANC attendance in a number of African settings. In Malawi, however, there were reports of women delaying pregnancy disclosure and ANC till the fourth month to avoid suffering witchcraft that could harm a pregnancy. Several techniques were employed to ensure the reliability of the findings: data were triangulated using a range of qualitative methods interviews, focus groups and observations with a range of respondents.

## **Senate Committees**

Abou-Zahr C, Wardlaw T 2003 Antenatal care in developing countries: promises, achievements and missed opportunities: an analysis of trends, levels and differentials, 1990—2001. Student drop-out rates tend to increase as an effect of school closures due to the challenge of ensuring all students return to school once school closures ends.

## **20th Century**

Therefore, messages about when to attend ANC communicated by health staff seemingly influence ANC attendance and ambiguous instructions can result in delays to ANC. Based on a comparison of longitudinal literacy data in kindergarten-aged students during a spring semester of schooling versus during summer vacation, one study predicted that school closures would slow the rate of literacy ability gain by 66% in kindergarten children in the absence of mitigating alternative educational strategies.
