Guidance: Management of Lithic Scatters in Scotland

The Pennsylvania FHWA division office, for example, would like to see a historic context on lithic scatters. All known sites were represented in the database by the UTM coordinate of their centroids; there was no attempt to establish or include information about site boundaries. It should be kept in mind that since the 1995 and 1996 survey designs were very different i.

Managing lithic scatters: archaeological guidance for planning authorities and developers

En el suelo arcilloso, los líticos fueron perpendicularmente desplazados en la dirección de la sembradora casi dos veces en comparación con los suelos arenosos 7. The agreement includes a set of criteria that the repository must adhere to before receiving the collection.

Planning Advice Note 2/2011: Planning and archaeology

Gateshead: Archaeological Research Services Waddington, C and Passmore, D G, 2012 Hunter-gatherer-fishers c. This process reduces subsequent laboratory analysis time and curation costs.

Planning Advice Note 2/2011: Planning and archaeology

This research project, completed in 2002, examined how DOTs, FHWA, and SHPOs use historic contexts, and provided recommendations on how historic context use can be improved and expanded through IT applications 12.

Disturbance to Surface Lithic Components of Archaeological Sites by Drill Seeding

A synthesis of information on rock circle sites in Nevada and surrounding states allowed the DOT to identify categories of this site type for which a lot of data had already been collected, and categories that were not well understood. In the three years since the appearance of the first catalogue in 2000, there has been rapid expansion in the use of the Internet for dissemination of digital data.

ArcLand

PhD Scholarship Available: The Archaeology of Upland Landscapes in Ireland Applications are sought for a UCD School of Archaeology, funded, full-time, 3 year PhD position. Such details and others, regarding material and tool types, for example, are also obtainable via additional forms accessed through the Data Forms menu. If state DOTs fund the creation of historic contexts, the Nevada DOT cautioned, they must ensure that the resulting historic contexts are linked to transportation project and development needs rather than serving academic research needs.

ArcLand

Planning authorities should seek to ensure that potential conflicts are resolved and agreements with developers concluded before planning permission is granted. I could, however, find no metadata recording the equipment used to scan the artefacts, nor any reference to the resolution of the images. Developers may wish to commission their own professionally competent archaeological organisation or consultant, whose work should meet the Institute for Archaeologists IfA quality standards, to develop this aspect of their proposals.

The Spatial Structure of Lithic Landscapes: the Late Holocene Record of East

Several called for the development of historic contexts.
