**Reynolds, Livingston & Willson, Measurement and Assessment in Education, 2nd Edition**

An attention problem such as attention-deficit hyperactivity disorder ADHD? If a person is having problems at work or school, or in personal relationships, tests can help a psychologist understand whether he or she might have issues with anger management or interpersonal skills, or certain personality traits that contribute to the problem. Neurological tests are used to diagnose cognitive impairments caused by brain damage due to tumors, infections, or head injuries; or changes in brain activity.
