Chapter 4: Ramps and Curb Ramps

Handrail Height and Clearance Handrail Continuity and Extensions Surface requirements and clearances facilitate a power grip along the length of handrails.

The Landing (2017)

Side flares, where provided, are intended primarily to prevent tripping hazards, not to accommodate wheelchair maneuvering at ramps except in alterations where sufficient landing space is unavailable. In addition, DOT requires detectable warnings on curb ramps in projects funded by the Federal Highway Administration.

Chapter 4: Ramps and Curb Ramps

Recommendation: Perpendicular curb ramps are preferred over diagonal curb ramps.

Landing

Yes, handrails can be installed on guard rails if all applicable requirements are met.

The Landing

Indoors, you can expect a perfect river view while sitting fireside at either of our lounge areas, enjoying the crisp, cool air and relaxing instrumental music. Extensions are not required for continuous handrails along switchback or dogleg ramps or at aisle ramps serving seating in assembly areas.

The Landing Grill & Sushi Bar

This guide explains requirements in the for ramps and curb ramps. Circular Cross Section and Clearance §505.

The Landing Current River

Landing is the act of returning to the ground after having been in flight or up in the air. Handrails can have circular or non-circular cross-sections, but must have rounded edges. Are detectable warnings required on curb ramps or at hazardous vehicular areas? New guidelines the Board is developing for public rights-of-way will further address curb ramps located along public streets and sidewalks, but they are not discussed in this guide.
