Sagittarius Ruling Planet and Nature

Jupiter is the king of everything that is huge, better and voluminous. The comparative results showed considerable differences among the otoliths of the studied fish groups, and demonstrated that with species divergence, otolith differentiate morphologically from generally oval, pentagonal or elliptic to a longer and thinner shape with further developed rostrum and antirostrum. Jupiter can be compared to a magnifying glass, which can make even a small opportunity look bigger than it is.

Sagittarius Ruling Planet and Nature

Characteristics of sagittae morphology in sixteen marine fish species collected from the Persian Gulf: Demonstration of the phylogenetic influence on otolith shape Previous studies have documented that some otolith features are genetically encoded and may have phylogenetic signals. Also, phylogenetic analysis supports the conclusion that general otolith shape is particularly important for discrimination of the higher taxa, while features related to rostrum and antirostrum dimensions are essential to discriminate species. Restlessness and inflexibility are other negative qualities of Sagittarius-born.

Sagittarius Ruling Planet and Nature

Sagittarius Strength: They are endowed with lots of positive qualities. They are also unpredictable in their actions. Since they are very athletic, they excel in sports and adventures.

Summa Theologica: Volume 3: Secunda Secundae Sancti Thomae Aquinatis, Opus plane aureum ... [and] Tertia Pars Summae Theologicae ... [and] Supplementum Ad Tertiam Partem by Antonius Senensis by Aquinas, Thomas; Sancti Thomae Aquinatis

It also suggests that they are very positive and try to look at the brighter side of life, never getting bogged down by any kind of difficulties.
