A Brief History of Bread

The pharmacist shares information with other healthcare providers as the setting for care changes thus helping assure continuity of care as the patient moves between the community setting, the institutional setting, and the long-term care setting. Organizations need to be good at knowledge generation, appropriation and exploitation. When this occurs, this represents 80 percent of the total fermentation time.

Thomas Paine: The Rights of Man

The temperature increases, the yeast dies, gluten fiber becomes firm, and the starches gelatinize. See, our yeast have been feasting on sugars since we finished our mixing, releasing CO₂ and fermenting our flour's sugar into alcohol and other fun stuff.
